- Small fruit trees

Our Mastermind

Name: Athanassios

Surname: Anthis

Profession: Agronomist

Experience: 48 years

Since 1974 a man full of passion dedicated in agriculture.

His excellent results have driven the multinational German agrochemical Schering AG Berlin to choose Greece to establish the First Mediterranean Field Station in 1985.

Following the excellent results of the field station, Schering AG has chosen to establish Schering Hellas SA at 1987.

Anthiis services

- Thorough knowledge of all problems of weeds, insects (soil and foliage), nematodes and diseases (soil and foliage) of all crops in all Greek territory.
- Thorough knowledge of chemical substances and biological substances.
- Excellent relations and built network with agronomists, agriculturists, state institutes and universities in all Greek territory.
- Know-how at all trials for screening – development – evaluation – promotion at all segments for all crops.
- Expertise in offering sustainable solutions for Industry and Distribution (compostable biopolymers)

Anthi's activities in seeds

We provide to professional growers:

- Vegetable seeds F1 & OP varieties, legume seeds, aromatic seeds.
 - Varieties for baby leaf harvest, microgreens and sprouts.
- Hobby packed seeds in various categories for supermarkets, garden centers, e-shops

Anthis activities in biotechnology

We provide to professional growers for all crops:

- Foliage liquid fertilizers, organic bio stimulants based on amino acids and oligopeptides with fast assimilation. They are certified for biological use and recognized by the Greek Organization of Inspection and Certification “Dionet” (civic non profit organization).
- Formulations which assist to plant immune system based on Ministerial Decision Y.A.217217/2004.

They are formulations based on mychorrizae and rhizosphere bacteria. The various microorganism formulations reinforce the plants as applied either at the useful root surface area, neck of plants and at foliage. Our formulations are applied at all crops (conventional & biological) with zero (0) residues from harvest.

They are certified for biological use and recognized by the Greek Organization of Inspection and Certification “Dionet” (civic non profit organization).

- Seed-dressing formulations.

For Agriculture:

Biodegradable & compostable certified mulch film.
Tying laces for greenhouse plants.

For Industry:

Biopolymers to replace petrochemical plastic polymers.

For Distribution:

Compostable single use products for foodservice.

For Waste Management:

Consulting & Supply of Compostable garbage bags for organic waste.
